*See reverse side for qualifying information

UNIQUE PROPRIETARY BALANCED AMINO ACID FORMULA

A unique blend of 19 highest quality USP L-Crystalline singular amino acids

To be taken in conjunction with a regimen of CNI Vita Mins+[®] see diagram on reverse side for specifications

Each capsule contains 750mg of the following ingredients in decreasing quantities

L-Lysine HCL, L-Tryptophan, L-Arginine Base, L-Isoleucine, L-Leucine, L-Alanine, L-Threonine, L-Histidine, L-Methionine, L-Cystine, L-Glutamine, L-Tyrosine, L-Aspartic Acid, L-Valine, L-Glutamic Acid, L-Phenylalanine, Glycine, L-Serine, N-Acetyl-L-Cysteine

RECOMMENDED FOR:

- ◆ Periods of ILLNESS, INJURY AND STRESS when additional amino acids are required by the body for tissue and cell growth and repair
- ◆ Helping to stimulate the immune system
- ◆ Assisting in reversing negative nitrogen balance
- ◆ Prior to and after surgical procedures
- ◆ Providing a balanced nutritional program, especially for restricted food programs including food allergies
- ◆ General health maintenance
- ◆ Creates feeling of well-being

WHAT ARE AMINO ACIDS?

Amino acids are the building blocks of protein, and are vital to understanding the Krebs Cycle. They are individual crystalline molecules that make up protein, similar to the way letters make up the alphabet. There are 20 basic amino acids that produce over 1600 substances in the body. They make up 3/4ths of the body's solid material, and are found in muscle tissue, organs, blood and skin. Amino acids also make hormones, enzymes, and vitamins, and are essential for a healthy immune system and proper neurological functions. It is necessary to replace amino acids constantly to nourish the body, and repair and regenerate tissue. Amino acids are generally ingested in the food we eat, however, because of processed foods, inadequate diets, and food restrictive programs, proper balance is rarely achieved and supplementation is advisable. Especially during illness, trauma, surgery and stress more amino acids are required than can be obtained by food alone. In the chronically ill, they can help reverse negative nitrogen balance, and help prevent tissue wasting. AMINO BALANCE+ is the recommended choice to help insure optimum balance and provide basic amino acid requirements.

SOME BENEFITS OF AMINO BALANCE+ FORMULA ARE:

- ◆ Highest quality L—Crystalline singular amino acids readily available for proper utilization and metabolism
- ◆ N-ACETYL-L-CYSTEINE — A major amino acid complex for liver detoxification. Precursor to Glutathione. Helps fight toxic compound build-up in body. Seen low in allergies and chemical sensitivities
- ◆ Taurine —for heart support, antioxidant properties and neurological health
- ◆ L-Arginine BASE — for immune function and cardiovascular properties. It helps increase Nitric Oxide production which is important for endothelial cells
- ◆ L-LYSINE — which is low in vegetarian diets, may inhibit viruses such as Herpes and EBV, and is found in muscle and connective tissue. Amino Balance+ formula has proper Lysine to Arginine balance
- ◆ L-TYROSINE —which crosses the blood brain barrier quickly, to elevate catecholamines (which are generally low in depression), and for proper neurological balance.

—INFORMATION CONTINUES ON BACK—

- BRANCHED CHAIN AMINO ACIDS - L-LEUCINE, L-ISOLEUCINE AND L-VALINE in proper balance for healthy muscle tissue
- L-GLUTAMINE — for muscle tissue, neurological and gastro-intestinal health, supporting the immune system and promoting proper glucogenic function
- L-GLUTAMIC ACID — important for neurological health and is a precursor to GABA
- L-ALANINE — helps stabilize blood glucose levels
- L-TRYPTOPHAN — is an essential amino acid for protein synthesis and the precursor to 5HTP and onto Serotonin. L-Tryptophan is unique for balancing sleep and fighting “the blues.” L-Tryptophan can make Niacin and Melatonin and is believed to be important in heart function
- L-PROLINE — is major amino acid found in collagen and cartilage and is important for maintaining youthful, healthy skin as well as maintaining and repairing connective tissue for joint care. It is also essential for the immune system
- L-METHIONINE — prevents deposits and cohesion of fats in the liver due to lipotropic factors, and assists in proper gallbladder function. It also has powerful antioxidant properties
- L-CYSTINE — promotes recovery of tissue, is part of the insulin molecule, and is useful in dermatology problems such as psoriasis and eczema, and is the major linkage system making up hair
- L-ASPARTIC ACID — helps in protective function and detoxification of the liver
- L-PHENYLALANINE is the precursor for epinephrine and catecholamine chemistry, and has been found useful in conditions of lethargy and extreme mental fatigue an essential amino acid.
- GLYCINE is important for proper glucose balance, formation of collagen, synthesis of creatine, prostate health and is involved in the central nervous system. It is essential for bile acid metabolism and is a biochemical constituent of the tripeptide Glutathione, which is an important antioxidant

DIRECTIONS: This is the highest quality, most unique and balanced amino acid formula on the market today. No digestion required! No potential food allergies! For eliminating stress and to create an overall feeling of well being with energy and confidence, take one to three capsules 20 to 30 minutes before meals, or as recommended by a health care professional, on an empty stomach with 6-8 oz. of diluted fruit or vegetable juice, (1/3 juice and 2/3 water). Do not take Amino Balance+ with milk or protein based drinks. These aminos will get into the blood stream very quickly! The unique balance of ingredients found in Amino Balance+ is not found in any other supplement product Doctors are saying this is a missing link in nutritional medicine! It is recommended that this formula be taken with vitamins and minerals.*

The amino acid fill is vegetarian friendly. Contains no yeast, egg, milk, dairy, nuts, shellfish, meat, corn, gluten, wheat, soy, sugar, salt, starch, preservatives, artificial color, fragrances or flavors, or binders.
